What's in CTP Student Kit?

The official CTP student/instructor kits consist of three instructor-led courses that provide the skills training and assessment for the objectives tested in the CTP exam. Students will set up, maintain and troubleshoot a data network, a telephony network, and a Voice over IP (VoIP) network during the course. The courseware includes easy-to-follow narrative text, hands-on labs, exercises and case studies.

The courseware contains 30+ hours of instructor-led training:

- Data Networking (12 hours)
- Telephony Networking (12 hours)
- Convergence Technologies 6 hours)

Why CTP Student Kit?

- Official courseware maps to the CTP certification objectives.
- CTP Certification Increases marketability in the ICT workplace.
- Validates convergence technology experience.
- All CTP certification student materials contained in one pack.
